Full reserve is a planning amount, not a payment obligation. Simplified estimate; review with a CPA. **usafreelancecalculator.com**

Planning scope: one business and W-2 income, base standard deductions only. No AMT, EITC, capital-gain/dividend tax, loss carryovers or age/dependent adjustments.
Negative modeled annual taxes reflect estimated refundable-credit offsets, not a guaranteed refund. Actual refunds depend on the complete return, withholding and payments.
Total modeled annual taxes are not an outstanding IRS balance. Ordinary W-2 payroll taxes: $765.00 (already associated with wages). Federal income/SE/additional taxes after refundable credits, excluding ordinary W-2 payroll and state tax: $0.00. Estimated federal withholding: $0.00. Selected annual federal planning reserve after withholding: $0.00; actual payments and filing circumstances may differ.
Dependent eligibility is assumed. ACTC uses the ordinary earned-income method, excluding the three-child payroll alternative.
